IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: CROOKS et al.
Title: ANALGESIC USES OF NORKETAMINE
AND KETAMINE/NORKETAMINE
PRODRUGS
Appl. No.: 10/714,643
Filing Date: November 18, 2003
Examiner: Yong Soo Chong
Art Unit: 1617
Confirmation Number: 2532

Declaration Under 37 C.F.R. § 1.132

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

1. I, Mark S. Kleven, Ph.D., do hereby declare as follows.
2. My educational background, research experience, work experience, and professional memberships are described below.
3. My educational background is as follows:
Ph.D., Pharmacology, University of Minnesota School of Medicine, Minneapolis, MN, 1986. NIH Pre-Doctoral Fellow.
M.A., Physiological Psychology, Marquette University, Milwaukee, WI, 1979.
B.A./B.S., Psychology, Biology/Applied Mathematics, Bemidji State University, Bemidji, MN, 1977. Honors Scholar (1974-1977); B.A., summa cum laude.

4. I have the following research experience and have published more than 70 peer reviewed articles, most in high impact journals.

In vivo/ex vivo neurochemistry, radioimmunoassay, immunohistochemistry, and receptor binding. Stereotaxic surgery (rats); in vivo brain microdialysis (rats); chronic indwelling cardiac catheters (rats and monkeys); ex vivo brain dissection (mice, rats and monkeys). In vivo, site-specific knock-down of gene expression using antisense and siRNA.

Operant behavior: conflict-procedure (pigeon); drug discrimination (mice, monkeys, pigeons, and rats); drug self-administration (monkeys, rats); conditioned avoidance responding (rats).

Unconditioned behavior: hypophagia (rats); stimulant-induced behaviors (mice, monkeys and rats); catalepsy (mice, monkeys and rats); 5-HT_{1A} agonist-induced behaviors (rat); DOI-induced head twitches (rat); prepulse inhibition (rat); locomotor activity (mice, monkeys and rats), forced-swimming test (rat); tail suspension test (mouse); apomorphine-induced climbing (mouse); social-isolation (rat); dopamine-induced eye blinks (monkeys).

5. My work experience is as follows:

Yaupon Therapeutics, Inc. (2006-)

Vice President Preclinical Development

Direct GLP and non-GLP Efficacy, Safety, and Toxicology studies conducted primarily by CROs, but also by Yaupon staff, supporting IND submissions. Manage out-sourcing of IND-enabling Safety/Toxicology studies and have a key role for compiling new STTRs, IND and EMEA submissions. Am currently PI on an SBIR grant supporting a Phase I clinical trial for Attention Deficit Hyperactivity Disorder. Ongoing projects involve treatment of smoking cessation, methamphetamine abuse, ADHD, neuropathic pain, psoriasis, and cutaneous T-cell lymphoma.

Consultant (2005)

Behavioral Pharmacology / Preclinical development

University of Pennsylvania, Dept. of Psychology, Philadelphia, PA (2005-)

Visiting Scholar

Ongoing support and development of data gathering tools and analysis of in vivo electrophysiology and behavioral experiments. For example, assist in data analysis associating behavioral events with neuronal activity.

Scientific Commercialization LLC., (2004)

Principal, Head Early Phase R & D

Consulted and authored reports on treatment of coronary heart disease, e.g., aspirin resistance, antiplatelet activity of ADP inhibitors and PPAR- γ agonists. Assisted advice for a critical sNDA review and developed leads for a new line of business.

Pierre Fabre Médicament, CASTRES, France (1992-2004)

Institute de Recherche Pierre Fabre

Pierre Fabre Médicament, the pharmaceutical branch of Groupe Pierre Fabre, is France's second-largest private drug firm, allocating 140 million euros (ca. 23% of revenues) to research and development.

Head, Behavioral Pharmacology, Neurobiology II (1992-2004)

Chargé de Mission, Fonction Support (2002-2004)

Directed pivotal in vivo studies leading to clinical development of more than six new chemical entities, (e.g., F15063 and others, e.g. eptapirone that are in Phase I-II clinical trials). Developed and implemented novel in vivo behavioral screening assays for schizophrenia, depression, and anxiety. Implemented in vivo gene-silencing constructs and intra-cranial delivery methods (e.g., siRNA and antisense).

The University of Chicago, Dept. of Pharmacological and Physiological Sciences,

Pritzker School of Medicine, Chicago, IL (1986-1992)

Assistant Professor (Research Associate (1989-1992)

Research Associate (1987-1989)

NIMH Post-Doctoral Fellow, Psychiatry (1986-1987)

Co-Principal Investigator on studies of pharmacological effects of acute and chronic cocaine in primates. Assisted direction of studies demonstrating the ability of dopamine D1 antagonists to block cocaine self-administration and its subjective effects in primates. Developed efficient behavioral methods in primates to test compounds for treatment of cocaine abuse. Principal Investigator on studies of cocaine neurotoxicity in rats. Characterized neurotoxic properties and structure-related activity of amphetamine-related compounds, such as the anorectic fenfluramine.

6. I am a member of the following professional organizations:

American Chemical Society,

American Society for Pharmacology and Experimental Therapeutics;

Collegium Internationale NeuroPsychopharmacologicum (Fellow);
College on Problems of Drug Dependence (Industrial Relations Committee: 1997-2000);
Drug Information Association;
European College of Neuropsychopharmacology;
European Behavioral Pharmacology Society (Executive Committee: 2001-2005);
Society for Neuroscience

7. I am providing this Declaration with respect to the reference B. Ebert *et al.*, European Journal of Pharmacology, Aug. 20, 1997, 333 (1):99-104, ("Ebert *et al.*") which was cited in the Office Action dated July 9, 2007, for the above-captioned application.

8. In Ebert *et al.*, the last sentence states as follows: "Clinical studies are now under way to investigate whether orally administered (S)-norketamine may have fewer side effects than (S)-ketamine."

9. Ebert *et al.* has four authors: Bjarke Ebert, Soren Mikkelsen, Christian Thorkildsen and Finn Molke Borgbjerg.

10. I have searched the online PubMed database by the following author names: Ebert B., Mikkelsen S., Thorkildsen C., and Borgbjerg, FM. The results of these searches are attached hereto respectively as EXHIBITS 1-4. I have also searched the Ovid database.

11. Neither the search of PubMed nor the Ovid database indicated that any of the authors of Ebert *et al.* has made a subsequent publication related to clinical studies of (S)-norketamine or norketamine.

12. I am not aware of any publications related to clinical trials of (S)-norketamine or norketamine, or any requests for regulatory approval of the therapeutic use of (S)-norketamine or norketamine. Given my level of professional knowledge related to (S)-norketamine or norketamine, I would have known if there had been any publications related to clinical trials requests for regulatory approval of the therapeutic use of (S)-norketamine or norketamine.

13. Because over ten years has passed since the publication of Ebert *et al.*, and no public record of any clinical trials of (S)-norketamine or norketamine exists, I conclude that it is most certain that either (S)-norketamine was never tested in clinical trials, or if such clinical trials did occur, they were unsuccessful, discontinued and never publicized.

14. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements are made with knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title XVIII of the United States Code and that willful false statements may jeopardize the validity of this Application for Patent or any patent issuing thereon.
